Converting Machinery

### DELTA Series Servo Driven

- One Master Roll with Shaftless Unwinder and Driven Tension control system which is folded using a Vertical V Folding Device to form the pouch.
- Multiple sealing and cooling station.
- All Sealing stations actuated by individual servo motor system to Control Seal time.
- Multiple Nip Roller system along the web path to Maintain even tension on the film.
- Touch screen PLC for setting all parameters like Size, Speed, Dwell time, Temperature Recipe storage function on PLC to save all parameters of a particular Job for ease of operator.
- Pneumatic Retraction of all sealing station on stoppage of Machine.
- Servo motor actuated cutter assembly.
- Auto conveyor for batch collection of pouches.

# Stand Up & Zipper Pouch Making Machine

## (Multi Servo System)

This is a versatile pouch making machine to produce 3 side seal, stand up with zipper Pouch & Doy pack.

The machine is equipped with One Master Shaftless unwinder to convert the film and make pouch from Single Web.

### Types of Pouches:

- 3 side seal pouches from master roll - Single up & Multiple ups.
- Stand up & zipper pouches 1 up from one Master Roll.

The machine is capable of making 3 side seal pouches from un laminated Co-ex multilayer film of PE/PA.
